

Carbon Reduction Plan . 2026

Supplier name: Second Front Systems Limited

Publication date: 09/07/2026

Commitment to Achieving Net Zero

Second Front Systems Limited is committed to achieving Net Zero emissions by 2050

Baseline Emissions Footprint

Baseline emissions are a record of the greenhouse gases that have been produced in the past and were produced prior to the introduction of any strategies to reduce emissions. Baseline emissions are the reference point against which emissions reduction can be measured.

Baseline Year: 2024

Additional details relating to the baseline emissions calculations.

This is the second time we have reported our carbon footprint, but due to significant changes in data availability we have chosen to rebaseline this year. It is based on our financial accounting year of February to January.

Our Baseline calculation includes:

- Scope 2: Indirect Emissions
- Scope 3 Categories: 1: Purchased goods and services: 3: Fuel and energy related activities: 4: Upstream transportation & distribution: 5: Waste generated in operations: 6: Business travel/Hotel stays: 7: Employee commuting/Teleworking: 9: Downstream transportation & distribution

Our Baseline deviates from the requirements under PPN 006 as follows:

- Scope 1: Direct Emissions is not included as office energy is accounted for in Scope 2.
- Scope 3: Category 1: Purchased goods and services is included; Scope 3: Category 3: Fuel and energy related activities is included, to provide a more complete Scope 3 calculation.

Baseline Year Emissions:

EMISSIONS	TOTAL (tCO ₂ e)
Scope 1	0 tCO ₂ e
Scope 2	1.1 tCO ₂ e

Carbon Reduction Plan . 2026

Scope 3 (included sources as detailed above)	5,031.3 tCO ₂ e
Total Emissions	5,032.4 tCO ₂ e

Current Emissions Reporting

Baseline Year Emissions:	
EMISSIONS	TOTAL (tCO ₂ e)
Scope 1	0 tCO ₂ e
Scope 2	1.1 tCO ₂ e
Scope 3 (included sources as detailed above)	5,031.3 tCO ₂ e
Total Emissions	5,032.4 tCO ₂ e

Emissions Reduction Targets

In order to continue our progress to achieving Net Zero, we have adopted the following carbon reduction targets.

We project that carbon emissions will decrease over the next five years to 3,984 tCO₂e by 2031. This is a reduction of 20.8 %

Progress against these targets can be seen in the chart below:

Carbon Reduction Plan . 2026

Carbon Reduction Projects

Completed Carbon Reduction Initiatives

The following environmental management measures and projects have been completed or implemented since the 2026 baseline and the measures will be in effect when performing the contract.

- Second Front is set up as a remote business to minimise employee commuting emissions
- We are paperless
- Our UK employees use renewable energy when working from home
- Only travel when necessary and use virtual meetings for majority of time

Future Carbon Reduction Initiatives

In the future we hope to implement further measures such as:

- Continue to grow the business using the remote model
- Engage with top 10 suppliers to get a Net Zero target in place

Declaration and Sign Off

This Carbon Reduction Plan has been completed in accordance with PPN 006 and associated guidance and reporting standards for Carbon Reduction Plans. Emissions have been reported and recorded in accordance with the published reporting standard for Carbon Reduction Plans and the GHG Reporting Protocol corporate standard and uses the appropriate Government emission conversion factors for greenhouse gas company reporting.

Scope 1 and Scope 2 emissions have been reported in accordance with SECR requirements, and the required subset of Scope 3 emissions have been reported in accordance with the published reporting standard for Carbon Reduction Plans and the Corporate Value Chain (Scope 3) Standard.

This Carbon Reduction Plan has been reviewed and signed off by the board of directors (or equivalent management body).
